"Some people code to live, I live to code."

Today

Lead iOS Developer
Roomvu - Vancouver, British Columbia, Canada

2024

Lead Software Developer | iOS
Self employed *FoodARomma* - Waterloo, Ontario, Canada

2023

Software Developer | Researcher
Smart Centre Applied Research - Cambridge, Ontario, Canada

2022

Lead Software Developer | iOS
Self employed *Penny* - Waterloo, Ontario, Canada

2021

iOS Developer | Flutter Developer
Innovation Incubator Advisory - Trivandram, Kerala, India

2020

Flutter Developer | Web Developer
Self Employed *Find* - Kanjirapally, Kerala, India

2019

iOS Developer
2Airport Driver & 2Airport - Trivandram, Kerala, India

2018

Programming Languages

Objective-C Intermediate
Swift, UIKit Expert
SwiftUI Professional
Python Expert
PHP Expert
SQL Expert
C# Professional
Java Professional
C | C++ Expert
Flutter Expert
JavaScript Expert
VB Intermediate
Dart Expert

Core Values

Continuous learner
Thrive on problem solving
Moderate perfectionist
Client focused
Curious and adventurous
Performance optimizer
Code debugging junkie
Understand full scope
Need to find root cause
Independent
Love teaching & sharing
Avid rule abider & challenger
Open source proponent

Skills & Experience
<https://bit.ly/41VxeoP>

Hobbies & Passion
<https://bit.ly/3RN2H8a>

04+

Years as a software developer

011+

Years usage in iOS and macOS

78840+

Hours invested in improving my trade

99.7%

Reliability average of live commercial deployments

SOFTWARE CRAFTMANSHIP

Web & Cyber Security Experience

HTML, JavaScript, TypeScript, JQuery, CSS, XML, Regex, Ajax, UI/UX, Wordpress, Xampp, Bootstrap, JSON, Ajax, Metasploit, Nmap, WireShark, sqlmap, John the Ripper, openssl, ARP Port Scanning, Vail, reverse TCP, Kali,

Backend Server Experience

PHP, MangoDB/MariaDB/MySQL servers, SQL queries optimization, Docker containers, Server replications, Linux server administration, Apache Local hosts, Python3, oAuth integration, HTTP/HTTPS custom API, Json & REST API. AWS Lambda, AWS S3, AWS IAM Roles, AWS RDS, AWS SageMaker, Cloud watch, EC2, API gateway, Azure, GCP, Github, Bitbucket, MicroServices,

Apple iOS/macOS Experience

CoreML, RESTFUL API, In-app payment processing, Stripe, SceneKit, ARKit, SwiftyJson, Alamofire, GPS & Mapping (Google Maps + Mapbox), MapKit, Core Location, SQLite & Core Data storage, UserDefaults, Camera & Photo Library, Dynamic live audio generation/mixing/routing, Core Animation, UI/UX + Custom controls, Expanding/collapsing user forms,, Accessibility integration, Device authorizations, App Store deployments, Usage statistics, DGCharts, User Notifications.

IT / Tech Experience

Machine Learning, Computer Vision, YOLO, SSD Mobilnet, model weight conversion, Blender, Ai 3D model conversion using images, OS installation, Hackintosh installation, Wireless networks, Ethernet wiring, Fiber optics splicing, LAN deployments, Shell Scripting, Advanced TCP/IP, IPv4 & IPv6, NAS Server, Wireless Data Backup, Network security, Switches & Routing, QoS Prioritization, LanChat, VPN, Backup & archiving, Secured access, Linux/ Kali/Windows/macOS

Some of the exciting projects I've worked on throughout the years:

Implementing an Undetectable Backdoor by Applying Veil Framework with kali linux and Metasploit targeted on windows Machine (*Research Paper Link*), Dev as an open source personal webpage using Html, css and JS (*Portfolio link*), getSchedule a python algorithm to get max leaves with college course schedules without going under a specific threshold. Auto_Complaint_Register to detect internet outages and notify ISP with outage timeframes. Web Data mining algorithms like Apriori, Sequence_patter, Golomb_Code, Playfair_cipher, elias_Delta, elias_Gama etc. tFlix a copy of netflix but with BitTorrent streaming of data. And more !.
